

STRAPPING MACHINE

FROMM A-93 Automatic

The A-93 is an automatic polypropylene (PP) strapping machine designed for medium volume users.

This machine straps at high speeds using little power and is capable of 24 hour continuous duty.

The A-93 is made with an aluminium alloy die casted main body block to ensure it stands the rigours of industry whilst remaining rust free.

Features

- Ideal for medium volume users
- High speed strapping
- Capable of 24 hour continuous operation
- Floating switch control
- Motors stop automatically after strapping to protect against overheating
- Low 24VAC electric control system for extra safety
