

POLYESTER (PET) STRAPPING TOOL

Australian Warehouse Solutions
Part of the **Fromm** Group of Companies

FROMM P330 Battery Operated

Features

With 600kg of tensioning force, nothing else compares to the Fromm P330. The battery operated tool caters for strap 19 to 25mm wide and pulls a strap tension of 6000N - delivering more tension than most automatic systems!

The P330 will reinvent the strapping industry by replacing all hi-tensile steel strapping in just about any application. The heaviest and most difficult applications such as steel, hardwood timber, brick, aluminium and zinc will now be able to benefit from the cost savings and safety benefits of polyester (PET) strap.

PET strap is safer, stronger and typically costs 40% less than steel strapping. Even for small users, this results in HUGE cost savings!

Technical Specification

Strapping qualities:	Polyester (PET)
Strapping dimensions:	Width: 19.0 - 25.0 mm - Thickness: 0.40 - 1.53 mm
Weight:	5.7 kg
Strap tension:	1200 - 6000 N (adjustable)
Power supply:	Battery 28 VDC/3.0 Ah Li-Ion
Sealing Type:	Friction seal
