

STRAPPING MACHINE

SMB SM1 - Automatic

Strapping at speeds of up to 45 bundles per minute, the SMB SM-1 machines are the fastest on the world market.

Their reliability is also guaranteed with no major service required until 1,000,000 cycles!

The SM-1 fully automatic machines use 5-9mm polypropylene (PP) strap and feature an adjustable strap tension of up to 325N which guarantees not to crush boxes.

To increase productivity and dramatically reduce roll changes, the SMB strappers are fitted with jumbo 12200 metre rolls.

Specifications

Capacity	Up to 45 straps/min
Size of Bundle	Width: 100 – 600 mm Height: 20 – 600 mm
Sealing Method	Heat seal
Tensile Strength of Joint	80% of breaking strength of strap
Tension Force	0 – 325N
Strap Material	Polypropylene Width: 5 - 9 mm Thickness: 0.40 – 0.45 mm
TPower Supply	240 V / 50 Hz
Weight	Approx. 170 kg

Features

- Strap width adjustable 5-9mm
- Automatic discharge of remaining strap
- Automatic ultrasonic strap tensioning
- Patented strap loop ejector finger
- Quick change strap dispenser
- Heat seal smoke dissipation fans
