

Rhino Speed Humps

Rhino Speed Humps caution speeding motorists that your carpark or road is not a raceway, and provide a safe and cost effective solution to traffic management problems.

Our innovative Speed Humps offer a quiet yet effective physical and visual deterrent to fast moving traffic.

Rhino Speed Humps can be relocated without damage to the hump or road surface, making them perfect for both permanent and temporary installations.

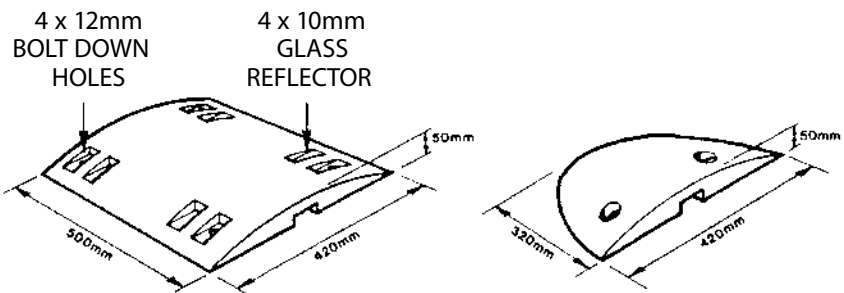

Rhino Speed Humps are ideally suited for local government authorities, shopping centres, retirement homes, caravan parks, real-estate property managers... any organisation seeking a cost effective solution!

Australian Warehouse Solutions offers a 100% money back guarantee with the Rhino Speed Hump!!!

Modules

Rhino Module	(L) 500 mm x (H) 50 mm
End Caps	Sold Separately

Rhino Speed Humps

Features

Easy to Install

Installed in minutes without any specialised equipment for minimal disturbance to other traffic.

Modular Design Flexibility

Flexible modules come in 500mm sections with attractive end section to complete the effect.

Less Noise

The sound absorption features of the Rhino Speed Humps reduce the noise pollution made by crossing vehicles.

Environmentally Friendly

Rhino Speed Humps are manufactured from tough recycled thermoplastic material.

Speed Control

Speed humps can be modified for required speed. Only vehicles that violate the speed limit get a substantial bump.

Material Benefits

Yellow and black colour will help drivers identify the need to use caution and slow down.

Safety

Rhino Speed Humps feature a chequered pattern for extra grip as well as vision deliniators for dark or poorly lit areas.

Movable

Try out several locations! Rhino Speed Humps can be removed and installed again without damaging the road or the hump itself.
